

## Case 7 - History

33 year old woman  
painful left eye 5 days ago  
vision reduced - can see light/dark only in left eye  
pain behind eye; worse on moving eye  
last year, had an episode of right leg numbness  
for 4 weeks; resolved now  
been feeling really tired lately  
What might make the symptoms worse?

Thoughts?

## Case 7 - Examination

Speech - normal  
HMF - normal  
Cranial nerves - VA left PoL only; right 6/5; left  
pupil dilated; rest normal  
Limbs - normal  
What bedside test might be useful?
