

Case 8 - History

45 year old man
sore throat for 1 week
mild generalised headache for last 3 days
last 24 hours been acting oddly - confused;
speech garbled; drowsy
collapsed at lunchtime - went stiff, jerked arms
and legs for two minutes
second attack 20 minutes later, in ambulance
still very drowsy on arrival at hospital

Thoughts?

Case 8 - Examination

Speech - not following commands; occasional
word
HMF - drowsy but able to rouse
Cranial nerves - normal (fundi hard to see)
ULs/LLs - not moving right side much but
withdraws from pain on that side
Temp 38 °C
